(54) AIR CLEANER DEVICE FOR SMALL SIZED ENGINE

(57)Abstract:

PURPOSE: To hardly accumulate dust in a filter, facilitate removal of accumulated dust, and thereby reuse the filter.

CONSTITUTION: The air cleaner device is provided with an air passage 12 which is so constituted as to be communicated in such a way that air forcibly enters in an inlet port 12a disposed close to a part 11a of an air cooling fan 11 for an engine 10, and air is forcibly exhausted out of an exhaust port 12b disposed close to the other part 11b of the cooling fan 11, and the aforesaid device is formed out of a carburetor chamber 14 where a carburetor 13 connected to the engine 10, is built in, which is communicated with the air passage 12 at the halfway of the passage, and of an air filter 15 provided for the communication part of the carburetor chamber 14 and the air passage 12.

## LEGAL STATUS

[Date of request for examination] 26.02.2002

[Date of sending the examiner's decision of rejection] 18.05.2005

✓ [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
